

Yes — **save it.** 🥹👏 You're good.

From the final version, you've got what we wanted: **one page**, a much stronger technical-skills section, Disney/FOWA/HP experience without taking over the page, and all three projects with **Hornet Navigator first**, then SmartBudget, then your portfolio.

Before closing Word, I'd save **two copies**:

- **Ask ChatGPT** **Start writing** — your editable master
- **Semaj-Morris-Resume.pdf** — the version you submit to jobs and put on your portfolio

And I'd stop calling the file "**Resume 2025-26**". Using your name keeps it professional and means you don't have to rename it every year.

Then replace the old résumé PDF in your portfolio repository with this new PDF so that purple **Resume** button on the site opens the updated version.

Yes, this version is ready. 🖥️🎓
